JAVA INTERVIEW QUESTIONS

Can we save Java file Without any name with just .java? #6

Code For Interview

Can we save java file without name?

Yes, Java allows you to save java files by .java only.

But this is against File Naming Rules and is not recommended.

And you can do it as long as you don't have any public class in the file (In Java, all classes declared as public must be stored with file name as public class name)

// Save File with .java only

```java
class First {
        public static void main(String args[]) {
                System.out.println("Printed Successfully");
        }
}
```

// Compile Using   **javac .java**
// Run Using   **java First**

QUESTION FOR YOU ALL

Will it Compile or Not?

// Save File with .jav only

```java
class First {
        public static void main(String args[]) {
                System.out.println("Printed Successfully");
        }
}
```
